

Chemical Engineering

"Students and graduates from this course are responsible and inquisitive. They have a good understanding of process engineering and are able to perform their task well with minimum supervision."

Lim Kiah Siang
Training Manager
Petrochemical Corporation
of Singapore (Pte) Ltd

Oil refinery giants, major manufacturers of petrochemicals, specialty chemicals and pharmaceutical giants all have a strong presence in Singapore. These companies, rooted in such diverse fields, have one thing in common – they rely on chemical engineers in all aspects of their operations.

Chemical engineers are involved in the manufacture of products such as fuel, cosmetics, petrochemicals, plastics, processed foods and medicine so that we can enjoy and reap the benefits of scientific discoveries. They hold crucial responsibilities in the process industry such as running plant operations, designing reactors and process equipment, improving efficiency as well as looking into the safety and environmental aspects of processes.

This course will equip you with knowledge and skills in chemistry and analytical chemistry, and laboratory techniques so that you will be well trained to do research and testing for the Chemical and Pharmaceutical Industry. Moreover, you will be trained in chemical process technology, occupational safety and health, as well as environmental technology, so that you will be able to operate and optimise manufacturing systems that produce the products that we use every day in a safe and environmentally friendly way.

The extensive scope of this course will prepare you for higher education. Besides the National University of Singapore and Nanyang Technological University, you can also enrol in the Singapore Institute of Technology for further studies. You will have opportunities for local or overseas internships at multinational corporations and reputable institutions.

Career Opportunities

Trained to be versatile, you can conduct research or testing in laboratories, or be involved in production and technical sales in a broad range of companies in various industries. Specifically, you can embark on a rewarding career in Singapore's world-leading energy and chemical industry. Alternatively, you can consider a fulfilling career in the fast growing pharmaceutical and biotechnology industry, which produces medicines used by doctors worldwide to improve patients' quality of life.
